grippe which lasted all winter and left me in a weakened condition. I felt at times that I would never be well again.
I read of Lydia E-Pinkham's Vege-table Compound and what it did for women passing through the Change of Life, so I told my doctor I would try it. I soon began to

appeared and your Vegetable Compound has made me a well, strong woman so I do all my own housework. I cannot recommend Lydia E. Pinkham's Vegetable Compound too highly to women passing through the Change of Life."
—Mrs. Frank Henson, 1316 S. Orchade

Women who suffer from nervousness, "heat flashes," backache, headaches and "the bees" should try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

Personality of Your Hall. The aspect of the hall should afford a cheerful yet reserved introduction to the rest of the house.

A hall has many definite functions to perform. It should not only serve as an attractive waiting room but should also give ready access to the main room of the house. Homes should never be so badly planned that some rooms are accessible only through

Halls should always be somewhat formal, for they are intended for the use of strangers and acquaintances as well as friends and relatives. Just now formal one's home entrance should be depends largely upon whether the structure is in the city or country. The interests and manner of living of the occupants also have much to do with this.

For Pimply Faces.

However, it was not necessary for long list published by the manufacthe French ambassador to lay much turers of men's clothing. A reduction stress upon his request to Paris.

The French government had made features are eliminated. the same request to its designers as the American government, and it was the manufacturers of men's costumes compliance with that request that have really gone into the conservacreated the narrow silhouette and the tion with determination. It is quite short, scant skirt which came out in astonishing how many small things French models last autumn.

At any rate, the request for the nated without detriment to the apgowns that are made of less than 41/2 pearance or serviceability of the gar-

Canteen coat for war workers. It was created by a Fifth avenue designer and is made of dark blue cloth with wide lap-over in front that allows the use of bloomers instead of a skirt beneath it, if desired. The red cross is made of cloth and placed on a square of horizon blue. The cap is of the ma-

yards of wool has been met in Paris by an almost total elimination of wool in the new spring models.

Mme. Paquin, who is the head of the association of designers over there, says that America need have nothing to fear in regard to extravagance with material in the new clothes.

The silhouette is to be as slim as it was in the directoire. Every material that can possibly be woven will be used as a substitute for wool. Twine will be used for embroidery whenever available, instead of

worsted. Therefore, with the joining of hands across the sea and no drastic excuse for using wool, it is possible to predict that the early season will be filled with gowns and suits of tussah, silk, crepe de chine and artificial silk jersey.

What Men Can Do. We women can wear thin materials in spring and summer, but men can't. or won't. Enormous quantities of worsteds are consumed for their suits throughout the year.

FOR A CHAFING-DISH PARTY, menu must all be measured out and

Simple Menu May Be Arranged and It Is Easy Way for Woman Without Maid to Entertain.

An easy way for a woman with no maid to entertain in the evening is to give a chafing-dish party. Invite six or | for the first course, which can be eaten eight friends to come in for cards or music, or after the movies,

Everything must be gotten ready be-

fore the guests arrive, the table set menu, and one that could be easily with the cloth or the dollies, and the chafing dish with the lamp filled, in its white grapes in sherbet cups, creamed place on one end of the table. Many oysters, lettuce sandwiches, salted women who do much of this sort of en- nuts, coffee, jelly with whipped cream tertaining, have a special chafing dish set of doilies. Oyster-white linen with and old blue, cross-stitched hem or crochet edge, and little figures in the corners to match would be most effective. These dollies are not as fine and this part of the blouse with a strip of dainty as the usual luncheon set, they oiled silk and there will be less likelishould be more "art-and-crafty." GOUD SUBSTITUTE FOR MEAT

Pound for Pound Cottage Cheese Contains 25 Per Cent More Protein Than Medium-Fat Side of Beef-Easy to Make.

Given a choice between a nice, juicy piece of beef and a dish of cottage cheese, and the chances are you would take beef. We are such a meat-loving people. But pound for pound, cottage cheese contains 25 per cent more protein-the body-building substance for which we eat meat largely-than a medium-fat side of beef. And the cheese costs about half as much. It has less energy value than beef, but of the Red Cross, but who is there in it is nevertheless capable of taking this country today who hasn't the right | meat's place in the diet.

This Cheese Easy to Make.

Because cottage cheese is a most palatable and nutritious product and because it can be made easily on a This coat has been designed by a small scale with little equipment in Fifth avenue dressmaker. It is of dark any kitchen and because it is an ecoblue cloth. It laps over so broadly in nomical and convenient means of utilfront that one has a strong suspicion lzing skim milk-a good food much that there are bloomers beneath inneglected-in the human diet, food States department of agriculture are urging its wider use to save meat. Haphazard methods used in making this choese together with the lack of Oods all the lack of Oods and the lack of Oods all the the hips. The revers fall back or lap this cheese, together with the lack of Ordinarily this will take about thirty simple and easily available directions, probably are responsible, the specialists say, for the comparatively small of clean-flavored sour milk may be quantities made and used at present. Uncertainty of results and defects in the finished products also have been enuses for discouragement in making. By following the directions given here it is believed a better and more uniform product may be obtained.

For making the cheese in small quantities for home use a very simple process and ordinary household equip-

HOW COTTAGE CHEESE TAKES MEAT'S PLACE

We eat meat chiefly to get protein, a body-building substance, and energy to perform body work. Cottage cheese can supply these body necessities almost as well as meat and more cheaply. For supplying protein one pound of cottage cheese equals-

1.27 pounds sirloin steak. 1.09 pounds round steak. 1.37 pounds chuck rib beef. 1.52 pounds fowl, 1.46 pounds fresh hami 1.44 pounds smoked ham, 1.58 pounds loin pork chor 1.31 pounds hind leg of lamb. 1.37 pounds breast of veal. On the basis of energy sup-

plied, one pound of cottage cheese equals-\$1-3 ounces sirloin steak. 11¼ ounces round steak.
11¼ ounces chuck rib beef. 10% ounces fowl.

ounces smoked ham,

6 ounces loin pork chop. 71-3 ounces hind leg of lamb. 12% ounces breast of veal. ment will suffice, but if it is desired to market the product and to insure good, uniform quality, it will be necessary to follow somewhat more elabor-

larger quantity for the market, is described in Farmers' Bulletin 850 of the United States department of agriculture. This is the way to make cottage cheese in small amounts, perhaps utilizing only a few cups of skim mllk -what is left aftg: the cream for the coffee has been removed.

First of all, start with good, clean skim milk and clean utensils. Careful attention then to the details of making will insure a good product. One gallon of skim milk will make about one and one-half pounds of

cheese. If the milk is sweet it should be placed in a pan and allowed to remain in a clean, warm place at a tem-•••••••••••••

AVOID "SQUAB CHICKENS;" THREE-POUND FOWLS BEST

Housewives can help the meat situation by buying three-pound broilers and friers and refusing to use "squab chickens" weighing a pound, one-half or less, Dressed-poultry specialists of the United States department of agriculture urge this as a conservation measure. Serving under-developed or "squab chickens" in hotels, restaurants and homes is regarded as a waste. for if kept four weeks longer. including two weeks of crate fleshing, such fowls would weigh about three pounds. Moreover. under proper feeding, a chicken makes the extra flesh largely from such by-products not ordinarily used for human food. such as buttermilk skim milk and low-grade grains.

hours, but when it is desirable to hasten the process a small quantity mixed with the sweet milk.

As soon as the milk has thickened or firmly clabbered it should be cut into pieces two inches square, after which the curd should be stirred thoroughly with a spoon. Place the pan of broken curd in a vessel of hot water so as to raise the temperature to 100 degrees Fahrenhelt, Cook at that temperature for about thirty minutes, during which time stir gently with a spoon for one minute at five-minute intervals Only Home Utensils Needed.

At the conclusion of the heating pour the curd and whey into a small cheesecloth bag (a clean salt bag will do nicely) and hang the bag on a fruit-strainer rack to drain, or the curd may be poured into a colander or a strainer over which a piece of cheesecloth has been laid. After five or ten minutes, work the curd toward the center with a spoon. Raising and lowering the ends of the cloth helps to make the whey drain faster. To complete the draining tie the ends of the bag together and hang it up. Since there is some danger that the curd will become too dry, draining should stop when the whey ceases to flow in a steady stream.

The curd is then emptied from the bag and worked with a spoon or a butter paddle until it becomes fine in grain, smooth and of the consistency of mashed potatoes. Sour or sweet cream may be added to increase the smoothness and palatability and improve the flavor. Then the cheese is salted according to taste, about one teaspoonful to a pound of curd.

Because of the ease with which the cheese can be made it is desirable to make it often so that it may be éaten fresh, although if it is kept cold it will not spoil for several days. If the cheese is not to be eaten promptly tte methods. The process of making it should be stored in an earthenware or glass vessel rather than in one of tin or wood, and kept in a cold place.

> In addition to being an economical food, milk is easily digested and requires no cooking or other preparation for the table. There are innumerable ways to use milk in cookery-puddings, blancmange, "Junket," soups, chowder-and in all these ways it is both appetizing and nourishing.

Dried peas and beans, dried and canned fish and meat, and some kinds may be weaned when six weeks old, of cheese keep well, and can be used but this is not advisable if they ap- in place of more expensive fresh meat in an emergency.

Defeat Backache and Kidney Trouble With Anuric

Many people in this section have suffered from rheumatism and kidney trouble and have found that Anuric was the most successful remedy to overcome these

painful and dangerous allments. The lucky people are those who have suffered, but who are now well because they needed nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's wonderful new discovery of Dr. Flerce's called "An-u-ric" (double strength). You should promptly heed these warnings, some of which are disky spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as stone in the bladder. If you want quick relief buy Anuric now (60c a package)—or send Dr. Pierce 10c for trial pkg.

This will prove that "Anuric" eliminates with sell as bot water melts sugar.

MRS. ELIZA TEETER, 610 N. Main St.—Adv. acid as hot water melts sugar.

SUGAR LONG GROWN IN JAVA

Production Has Been Pushed Rapidly and There is Room for Further Development.

The cultivation of sugar cane is an old industry in Java. The production has increased rapidly and the end is not yet. Between 1850 and 1860 Java produced less than 100,000 tons a year. Sugar tonnage increased rapidly and steadily, until in 1904 the million-ton output was reached, and it is thought that the two-million ton mark will be passed within two or three years, A writer in the Americas, issued by the all quite ignorant of written scores; National City bank of New York, says but they have quick and sensitive ears, that while the cultivation of sugar is since their harmony is purely instinca very old industry in Java, it has tive. Curiously enough they most oftpassed through many vicissitudes. Fifty years ago, he says, the sugar was raised almost entirely by native farmers, who paid a part of their crop to the government as rent. The rise of beet sugar growing in Europe made it necessary in order to compete to introduce a more efficient system. Todny the cultivation is done by the nufacturers themselves. They lease the land from the natives, who in many cases are the owners, or from the native communities. Many small properties are thus united under the management of a manufacturer during the period of one planting-that is, about three years. After each planting the land is turned back to the native proprietors for growing rice or corn until its fertility for sugar production is restored.

GREEN'S AUGUST FLOWER

has been a household remedy all over the civilized world for more than half a century for constipation, intestinal troubles, torpid liver and the generally depressed feeling that accompanies such disorders. It is a most valuable remedy for indigestion or nervous dys pepsia and liver trouble, bringing on headache, coming up of food, palpitation of heart and many other symptoms. A few doses of August Flower will immediately relieve you. It is a gentle laxative. Ask your druggist. Sold in all civilized countries.-Adv.
